Day 2: Innsbruck - Strass 44 km

You leave the city through the Olympic Village and enjoy a wonderful view of the Inn Valley and the surrounding mountain ranges. You arrive in today’s stage destination Strass at the entrance of the Zillertal valley via Hall and Schwaz.

Today you can look forward to seeing several castles, which show you the way to Brixlegg. It is worthwhile to take a hike through the wild romantic Kundler Klamm, before you reach Kufstein (“the Pearl of Tyrol”).

Bikes

Hybrid Bike

A special highlight is the stepless NuVinci-Gearshift. In general stepless means, that the bike has an endless number of gears. Every light movement of the intuitive rotary handle allows you to fine tune your chosen gear. The entire span can be compared to a bicycle with 18 gears. The new bike with the NuVinci-380-Gearshift does of course have the manufacturer's premium model at its disposal, which distinguishes itself through excellent efficiency.

Electric Bike

The Bosch Active Line-mid-mounted motor stands out with regards to performance and riding experience and offers sufficient range with an efficient charger. The display for the necessary settings can be operated easily and provides for an optimal level of assistance. A highlight is the stepless Nuvinci-Gearshift. By using the intuitive rotary handle one always cycles in the right gear without the interruption of treading on the pedals. The well-cushioned bike allows for comfortable riding, even when the terrain is somewhat bumpy at times.

Assisting people in realizing their touring dreams worldwide is our passion.
