### Bikes

#### 7 speed tourer

#### 21 speed tourer

We would recommend the 7 speed tourer for all those that are looking for a back pedal brake and wide gel seat for maximum comfort in an upright sitting position. It is equipped with a simple hub gear shift and is perfectly suited to tours on flat to slightly hilly terrain.

The 27 speed tourer is the best choice for cyclists that value the advantages of the dérailleur gear shift for flexibility whilst going up and down hills. This bike allows you to be a little more active without compromising on saddle comfort and practical everyday suitability.

#### **E-bike**

This e-bike provides all the comfort you could possibly desire. You can switch its electric drive on and off at any time and get to your destination with ease – particularly handy if, for example, you are doing a longer or more hilly section or if you are pulling a child transporter. The suspension fork and sprung seat post ensure a gentle ride, whilst the hydraulic brakes provide the utmost safety.

*Assisting people in realizing their touring dreams worldwide is our passion.*
